

I wish to voice my support of RM-10352 which segmentizes the 160 meter radio amateur band by operating mode.

I operate on the 160 meter band and feel that RM-10352 will help to maximize weak signal distance work by limiting wide band modes to 1.843 khz and above.

I also feel this will benefit all parties involved by reducing disputes between amateurs. i.e. digital mode ops, SSB/AM ops and FCC

Best Regards,

Robert L. (Bob) Gill
